

Quatela
CENTER FOR
PLASTIC SURGERY

WHY THE QUATELA CENTER?

1 EXPERIENCE

Acknowledging the distinction that cosmetic surgery is both an art and a science, coupled with countless years of experience, ensures you are in trusted hands at the Quatela Center.

2 QUALITY

The quality care at the Lindsay House is reflected in our highly trained staff and their unwavering commitment to your safety and comfort.

3 RESULTS

Our results speak for themselves through our thousands of satisfied patients. Every treatment is customized with your personal needs in mind to ensure the result that you are looking for.

SURGICAL

FACE

- **Facelift** | Tightens the muscles and skin of the lower third of the face
 - **Mini Facelift** | Ideal for mild skin laxity on the lower third of the face
 - **Brow Lift** | Lifts and tightens the skin and muscles of the forehead
 - **Mid Facelift** | Rejuvenates the middle portion of the face between the frown lines and lower eyelids
 - **Neck Lift** | Addresses jowls and neck for a more defined jaw and chin
 - **Eyelid Lift** | Removes excess tissue of the upper eyelids and/or fat of the lower eyelids
 - **Rhinoplasty** | Improves the nose aesthetically to harmonize better with the other facial features
 - **Revision Rhinoplasty** | Improving the result of a previous rhinoplasty for an aesthetically pleasing nose that also allows the patient to breathe well
 - **Chin Augmentation** | Creates a more defined chin and jawline and balances the facial profile
 - **Cheek Augmentation** | Enhances the cheek area for fuller, more defined cheeks
 - **Lip Augmentation** | Enhances the size, shape, or fullness of the lips
 - **Otoplasty (Ear Pinning)** | Corrects ears that protrude to give them a symmetric appearance
 - **Neck Liposuction** | Removes fat from under the chin
 - **Fat Injections** | Excess fat is harvested from the neck/chin to be injected into smile lines and/or lips
 - **Skin Resurfacing (Peels, Dermabrasion, CO2 Laser)** | Removes the outer layer of the skin using abrasion, chemicals, or laser to correct lines, wrinkles, and pigment changes
 - **Mohs Reconstruction** | Restores form and function to the head and neck after skin cancer has been removed
-

BREAST AND BODY

- **Breast Augmentation** | Uses implants to increase the size of breasts, restore volume, achieve a more rounded shape or correct breast asymmetry
 - **Breast Lift** | Repositions the breasts by removing excess skin and tightening the surrounding tissue to reshape and support the breast contour
 - **Breast Augmentation with Lift** | Restores the breasts to their previous position and shape while addressing lost volume
 - **Breast Augmentation with Fat Transfer** | Uses fat from your own body obtained through liposuction to enhance the breasts
 - **Breast Reconstruction** | Restores the size, shape, and appearance of breasts that have been altered due to a mastectomy
 - **FTM Top Surgery** | Removes breast tissue and masculinizes the chest
 - **MTF Chest Feminization Surgery** | Uses breast implants or fat to feminize the chest
 - **Breast Reduction** | Gives proportion to the body and alleviates tension and strain of large breasts by removing excess breast tissue and skin
 - **Male Breast Reduction** | Restores a flatter, firmer and more masculine contour to the chest
 - **Tummy Tuck** | Creates a flatter, smoother abdomen by removing excess fat and skin
 - **Mommy Makeover** | Combines a tummy tuck, liposuction, and breast procedure to restore a woman's shape after pregnancy and childbirth
 - **Liposuction** | Removes unwanted fat and sculpts areas of the body such as the waist, arms, thighs, buttocks, and stomach
 - **Smartlipo™ Laser Body Sculpting** | Reduces unwanted fat with the added benefit of tightening loose skin at the same time
 - **Arm Lift** | Removes excess fat and loose skin on the upper arms
 - **Thigh Lift** | Elevates the fat and skin of the inner or outer thighs
 - **Bra Line Back Lift** | Minimizes rolls found on the back by removing excess skin and fat
 - **Buttock Augmentation** | Enhances the size of the buttocks using implants or fat transfer
 - **Cellulaze™** | Reduces cellulite on common problem areas such as the thighs and buttocks
 - **Body Contouring after Weight Loss Surgery** | Removal of excess skin after massive weight loss
 - **Labiaplasty** | Surgical re-contouring of the labia
-

HAIR

- **Follicular Unit Transplantation (FUT)** | Removes a strip of hair-bearing skin from the back of the scalp to harvest and transplant grafts
- **Follicular Unit Extraction with the NeoGraft® system (FUE)** | Extracts and transplants donor hair with no excision, preferable for patients who wear their hair short

NON-SURGICAL

FACE

- **Botox®** | Minimizes early signs of aging in the forehead and crow's feet areas and can be used for jawline contouring in the masseter
 - **Injectable Fillers** | Minimally invasive fillers correct a variety of concerns, such as wrinkles, fine lines, and volume loss and can be used to perform a non-surgical rhinoplasty
 - **PrecisionTx™ for Facial Contouring** | Laser treatment to contour the jawline and neck
 - **Split Earlobe Repair** | Restores the appearance of earlobes that have been torn or stretched
 - **Lip Augmentation** | Enhances the fullness and shape of the lips with injectable fillers
 - **Skin Resurfacing (Peels, Dermabrasion)** | Resurface a small area of the outer layer of skin to minimize acne and other scars, lines and wrinkles
-

BREAST AND BODY

- **Inverted Nipple Repair** | Corrects nipples that are flat or inward
 - **Nipple Reduction** | Reduces prominent nipples
 - **Areola Reduction** | Reduces the size and area of the areola
 - **Laser Vaginal Rejuvenation** | Tightens the vaginal walls, restores tone to tissue and increases blood flow to treat vaginal dryness, discomfort, frequent urination, or pain during intercourse
 - **Scar Revision/Therapies** | Used to enhance the healing of scars and reduce their visibility
 - **PrecisionTx™ for Sweat Glands** | Laser treatment to reduce excessive sweating in the underarm area
-

HAIR

- **PRP for Hair Restoration** | In-office procedure to help reverse hair thinning and encourage new hair growth using platelet-rich plasma, the portion of your blood that contains growth factors

MEET OUR DOCTORS

VITO C. QUATELA, M.D., FACS

Dr. Vito Quatela, a recognized leader in the field of aesthetic facial surgery, is Board Certified by the American Board of Facial Plastic and Reconstructive Surgery and the American Board of Otolaryngology – Head and Neck Surgery (ABO). Dr. Quatela's mission to improve people's lives by aesthetically enhancing their appearance and increasing their confidence has led him to develop a comprehensive practice, which extends beyond traditional facial plastic surgery.

He is the founder of Q the Medical Spa at Lindsay House, which offers non-surgical cosmetic treatments, and the Quatela Center for Hair Restoration, which offers state-of-the-art hair restoration solutions. Dr. Quatela, with over 25 years of hair restoration experience, is a Diplomate of the American Board of Hair Restoration Surgery.

Dr. Quatela is the past President of the American Academy of Facial Plastic and Reconstructive Surgery (AAFPRS) and serves annually as a Board Examiner for the American Board of Facial Plastic and Reconstructive Surgery (ABFPRS) certification examinations. He also fulfills the role of preceptor for an annual AAFPRS Fellowship. Throughout his over 30 years of experience, Dr. Quatela has performed over 3,000 facelift procedures and 2,500 rhinoplasty procedures.

Dr. Quatela has been acknowledged as a distinguished educator, evidenced by his many national and international Professorships and Lectureships. He has been published in multiple medical journals and publications. Dr. Quatela is frequently interviewed by members of the press and has been featured in the Wall Street Journal, W Magazine, Los Angeles Times, New York Times, ABC, NBC, FOX and CBS.

His compassion for others, especially children, is demonstrated by his charitable organization, the HUGS (Help Us Give Smiles) Foundation, Inc. HUGS supports annual medical missions for children born with deformities in Ecuador, Guatemala and Vietnam. Since its inception in 2003, HUGS medical mission teams consisting of world class doctors and nurses have gone on 28 mission trips and have performed over 1,500 surgical procedures.

WILLIAM J. KOENIG, M.D.

Dr. William Koenig has partnered with the Quatela Center for Plastic Surgery since 2003, specializing exclusively in breast and body procedures. He previously worked at the prestigious Guthrie Clinic in Sayre, Pennsylvania where he is well-known and recognized for his work in plastic surgery.

A graduate of Northwestern University, he is Board Certified by the American Society of Plastic Surgeons with over 25 years of

experience in breast augmentation, abdominoplasty (tummy tuck), liposuction, body lifts after significant weight loss, and other body sculpting procedures.

He has performed over 2,100 breast augmentations, over 1,000 tummy tucks, and 1,500 liposuction procedures thus far throughout his years of practice. He presented findings related to his breast augmentation surgeries in a paper titled, "Primary Breast Augmentation: A Single Surgeon's Experience with Nearly 1000 Cases" at the Northeastern Society of Plastic Surgery in Boston. The presentation highlighted his low complication rates as compared to national averages.

Patients choose Dr. Koenig for his excellent bedside manner and his ability to develop personalized treatment plans for patients based on their individual goals. He is

known for his meticulous nature, which is evident in his successful surgical outcomes.

Dr. Koenig and the Quatela Center for Plastic Surgery are Allergan Top 250 Practice providers of Botox® and Juvederm®. Patients often request Dr. Koenig for their injectable treatments because of his ability to achieve natural looking, refreshed results.

In addition to an impressive resume of national and international presentations, publications, book chapters, and scientific exhibits, Dr. Koenig uses his surgical expertise to help children. He has traveled extensively to Central and South America and the Philippines, annually performing volunteer surgery on children with cleft lips/palates with Operation Hope and the HUGS Foundation, Inc.

MEET OUR DOCTORS

EMESE KALNOKI, M.D.

Dr. Emese Kalnoki joined the Quatela Center for Plastic Surgery in 2017. With seven years of private practice experience, she is a Board Certified plastic surgeon specializing in aesthetic and reconstructive breast surgery and body contouring procedures.

Dr. Kalnoki previously resided in Arizona where she owned and operated a successful plastic surgery practice in the Phoenix Valley area. During that time, she took a particular interest in reconstructive breast surgery to address the effects of breast cancer and performed approximately 400 breast reconstruction procedures and 350

breast reconstruction revisions. She also dedicated much of her practice to body contouring plastic surgery, particularly those procedures used to address the effects of weight loss or pregnancy.

Dr. Kalnoki graduated with a Bachelor of Science degree in Biochemistry from the University of Chicago, while also completing a minor in Egyptology. She obtained a Master of Science degree in Biology before going on to study medicine in her home state of Ohio at Wright State University.

Dr. Kalnoki completed five years of general surgery training at Banner Good Samaritan Hospital in the Phoenix Integrated Surgical Residency program. She went on to the University of Louisville in Kentucky for her two-year training in plastic surgery.

Due to her passion for breast and body contouring surgery, Dr. Kalnoki did further specialty fellowship training in Grand Rapids, MI with Dr. Dennis Hammond, an internationally recognized breast and body surgeon. During her fellowship, Dr. Kalnoki gained expertise in performing demanding surgical procedures such as

body contouring after weight loss and the SPAIR breast reduction, which minimizes scarring compared to traditional techniques. She also gained great experience in complex aesthetic and reconstructive breast revisions.

Dr. Kalnoki's hobbies include horseback riding, hiking with her family, and oil painting. Her talents as a painter help to refine her aesthetic vision by training her hands to create that which her eyes see. This complements her work as a plastic surgeon.

Dr. Kalnoki strives to give every client personal, concierge care. She recognizes that each individual is unique and adheres to the philosophy that plastic surgery should provide patients with a restored sense of self-confidence and wellbeing. Her surgical expertise combined with an unwavering dedication to patient care sets Dr. Kalnoki apart from others in the field of plastic surgery and makes her a perfect fit at the Quatela Center for Plastic Surgery.

Influential Surgeons Guest of Honor for the Arizona Chapter of the American Cancer Society Gala 2016

HEATHER LEE, M.D.

Dr. Heather Lee, a member of the American Academy of Facial Plastic and Reconstructive Surgery and the American Academy of Otolaryngology, rounds out the team of plastic surgeons at the Quatela Center for Plastic Surgery. Having trained under Dr. Vito Quatela for her fellowship in Facial Plastic and Reconstructive Surgery at the Lindsay House in 2016, Dr. Lee officially joined the surgeons at the

Lindsay House in 2017, furthering relationships with patients who have entrusted her with their care, while also welcoming new patients into her practice.

Dr. Lee has developed expertise in facial plastic surgery with a focus on both aesthetic and functional procedures, including facelift, brow lift, cosmetic and functional rhinoplasty, facial resurfacing, Mohs repair, cosmetic and functional blepharoplasty. She and the Quatela Center for Plastic Surgery are Allergan Top 250 Practice providers of Botox® and Juvederm®, and offer patients a variety of injectable fillers for their individual needs.

Dr. Lee's dedication to and compassionate care for her patients rests upon our shared philosophy that plastic surgery creates uplifting experiences that change people's

lives, from young children to older adults.

Passionate about giving back to communities at a local, national and global level, throughout her medical training Dr. Lee has provided care at women and children's clinics and offered skin and head and neck cancer screenings to her local community. She began her work in global health during residency when she traveled to Africa to operate on and care for Kenyans with large compressive goiters. Through Dr. Quatela's HUGS Foundation, Dr. Lee has continued her international work by reconstructing the ears of patients with microtia, a congenital defect of the ear, in Guatemala, Ecuador and Vietnam.

LINDSAY HOUSE SURGERY CENTER

Lindsay House Surgery Center is a freestanding, multispecialty ambulatory surgery center where our surgeons perform outpatient surgical procedures. It is licensed by the State of New York and the federal Medicare program.

The surgery center offers two operating rooms and two procedure rooms, and fully equipped preoperative and post-anesthesia care areas - to provide the highest level of care and safety in outpatient surgery. Specially designed to put your needs first, the center offers a full weekday schedule and free on-site surface parking.

Today, outpatient surgery in a freestanding setting has become more than accepted; it has grown to be the preferred alternative.

ACCREDITATION

The Lindsay House Surgery Center is accredited through the AAAHC (Accreditation Association for Ambulatory Health Care).

Accreditation is a process through which the center is measured by its quality of services and performance against nationally recognized standards. The accreditation process involves a thorough review by the Accreditation Association's expert surveyors, who themselves have extensive experience in the ambulatory health care environment.

The accreditation certificate is a symbol that an organization is committed to providing high-quality health care and has demonstrated that commitment by measuring up to the AAAHC's high standards.

The Lindsay House Surgery Center, a provider of services to the Rochester region, welcomes you to our surgery center. This AAAHC accredited, freestanding surgery center gives patients and our physicians a convenient, yet equally sophisticated alternative for surgery.

TRAVEL AND POST-OPERATIVE ACCOMMODATIONS

The doctors and staff at the Quatela Center welcome out-of-town patients and will do everything possible to ensure that all of your needs are met during your stay. Our staff is happy to assist with travel planning and accommodations.

WHY TRAVEL TO THE QUATELA CENTER?

Whether you travel to the Lindsay House or another facility, don't let travel costs be the determining factor in selecting your surgeon. Choose your surgeon and facility based on experience and qualifications, not location. When you compare the costs, travel expenses are small compared to the confidence of selecting a qualified and experienced surgeon.

ARRANGE A TRIP TO THE LINDSAY HOUSE

When you are ready to schedule your surgery, our Patient Consultants are here to help you. They have years of experience working with out-of-town guests and will provide travel assistance including help with lodging and travel arrangements. Our staff is happy to answer your questions and provide specific information such as how long you should stay in Rochester, transfer to and from the airport and any other details to make your trip easy and comfortable.

OVERNIGHT ACCOMMODATIONS

To assist you with your stay, we have special rates with premier hotels close to our facility. These include The Strathallan and the Inn on Broadway. Please contact a Patient Consultant for more information.

For added convenience and comfort following surgery, some patients choose to stay in a supervised setting at our Carriage House on their first post-operative night, located adjacent to the Lindsay House. Especially for guests without the benefit of family or friends in the Rochester area, our staff is happy to assist you with overnight arrangements with a nurse.

Built in 1878, the Lindsay House reflects a time in our nation's history when industry and ingenuity were on the rise. The Rochester area, like so many cities across the nation, flourished in wealth and grandeur as our nation collectively enjoyed an era of innovation and expanded commerce. Wealthy inhabitants displayed their great success through the construction of stately homes and mansions. One such mansion, located across the street from the historic Eastman House, is the Lindsay House.

Over a century had passed, and the Lindsay House had fallen into dramatic disrepair. Present day owner, Vito C. Quatela, M.D., had long held the vision to build a medical practice within a restored historical building. Purchased in 1992, he began the long and challenging journey of making his dream a reality. The home we see today was made possible through the desire and creative vision of one man to capture the original sweeping beauty and architectural grandeur of yesteryear. The project took perseverance, patience, aesthetic precision and great respect and love of the past.

HISTORY OF THE HOUSE

The Lindsay House was built in 1878 by Alexander Millar Lindsay, of Sibley, Lindsay and Curr. He built the house for his wife, four daughters and three sons. The house was a three-story Victorian mansion designed by James G. Cutler. The homestead extended from Barrington to Berkeley, and from East Avenue to Park Avenue.

Over the next twenty years, considerable changes were made to the house. In 1900, the sun room was added. It was the “crowning glory” to Mr. Lindsay’s creation and provided the future setting for the weddings of all four Lindsay daughters.

The sun room overlooks a boxwood rose garden originally designed by renowned landscape architect Allen DeForest. DeForest also designed gardens and landscapes for Eastman, Bausch, Lomb and Gannett in the Rochester area. Mr. Lindsay resided in the home until his death in 1923. He was eulogized by George Eastman in a wake conducted in the sun room.

The home remained in the Lindsay family until the late 1940’s when it was donated to the Rochester Health Association, which provided needed community services, including Operation Friendship.

IMPECCABLE RESTORATION

The Lindsay House came to the market and was purchased by Vito C. Quatela, M.D. in 1992. Dr. Quatela soon entered into a complete historical restoration and expansion project on the house’s exterior, interior and gardens. During the restoration project, the historic garden was painstakingly moved off site to a nursery. It was returned to the site in sections and replanted in its original 1900 form when renovations were completed.

The Lindsay House is now home to the Quatela Center for Plastic Surgery, Lindsay House Surgery Center, Quatela Center for Hair Restoration and Q the Medical Spa at Lindsay House located on the third floor.

THANK YOU FOR CONSIDERING US...

When it comes to cosmetic surgery, we understand that you have options. We also recognize that the decision to undergo cosmetic surgery is a very important one that you may have been thinking about for years.

At the Quatela Center, we are here to help guide you in the right direction and to create a customized treatment plan that fits your lifestyle, budget and personal goals. We want to work with you to ensure that you are pleased with the options available to you.

We are one of the only practices in the area whose doctors are solely dedicated to their respective specialties in cosmetic and reconstructive procedures. This allows us to provide an unparalleled experience for our patients and ensures that we provide them with support and care every step of the way. If you choose to undergo treatment with us, we hope that you consider us a partner. Plastic surgery is not a destination; it is part of a journey and we are here to ensure that it is a successful one.

We are honored to be involved in your process and appreciate that you are considering us for your treatment. If at any time you have questions or concerns, our entire team is here to help you. Please do not hesitate to contact us.

Thank you,

VITO C. QUATELA, M.D., FACS

WILLIAM J. KOENIG, M.D.

EMESE KALNOKI, M.D.

HEATHER LEE, M.D.

If you would like more information, as well as to view before and after photos of select patients, please visit our website at www.quatela.com.

“There are no shortcuts to quality.”

- Vito C. Quatela, M.D.

Patient satisfaction is my top priority, and I know that in order to achieve true quality, no shortcuts can be taken. This is evident in my care and attention to detail while operating, and the fact that I give patients my undivided attention while in an appointment. What seems superficially to be the same endpoint, in the face of shortcuts, will have quantitatively a very different outcome. This mantra reminds me that while many are seeking “quick fixes” in today’s society, my work is most about superb quality.

Plastic surgery is not an easy fix or an isolated experience. I always encourage my patients to be actively involved in the entire process. The more involved patients are, the better the surgical outcome and the more satisfied they are with their results. Plastic surgery is a lifelong commitment and should be partnered with efforts to improve the quality of one’s life. In addition to what I recommend surgically, I encourage patients to have healthy habits, improve their diet, exercise regularly and have good balance in their lives. This holistic outlook results in satisfied patients who are invested in making the most out of their lives. It’s a privilege to be part of this process with my patients.

- William J. Koenig, M.D.

“Tell me and I’ll forget;
show me and I may
remember; involve me
and I’ll understand.”

Chinese Proverb

“Let the beauty of
what you love be
what you do.”

Rumi

I adhere to the philosophy that plastic surgery should provide patients with a restored sense of self-confidence and well-being. I love helping patients find the beauty that they see within reflected in their outward appearance. I also have a passion and talent for art which I bring into my work as a plastic surgeon. The precision, attention to detail, and vision for the finished work that is required for painting is reflected in my surgical results.

– Emese Kalnoki, M.D.

What motivates me is the pursuit of excellence, and the focus of this intention is always centered around the patient. With this at the core of our practice, we are able to deliver a world-class experience with the highest standard of individualized care and results.

“Exceptional care begins
with a commitment to
excellence.”

– Heather Lee, M.D.
